2. Project Overview

Purpose:

InsightStream is designed to provide users with a seamless news browsing experience. It aggregates the latest news articles from various sources, allowing users to explore trending stories, filter by category, and bookmark their favorite content.

Features:

- Dynamic News Feed with Real-Time Updates
- Category-Based Filtering (Politics, Sports, Tech, etc.)
- Search Functionality for Finding Specific News

- Bookmark Feature to Save Favorite Articles
- Responsive Design Optimized for All Devices
- Light/Dark Mode for Enhanced User Experience

3. Architecture

Component Structure:

App.js - Root component that handles routing and layout

Header.js - Navigation bar with search functionality

NewsList.js - Displays categorized news articles

NewsCard.js - Individual news item with title, image, and description

NewsDetails.js - Detailed view of a selected news article

Footer.js - Provides additional links and site information

State Management:

- Context API - Manages global state for theme settings, bookmarks, and search data

Routing:

- React Router - Implemented for seamless navigation between pages

4. Setup Instructions

Prerequisites:

- Node.js (v18 or higher)
- npm or yarn

Installation:

1. Clone the Repository:

```
git clone https://github.com/darunraj0071/insightstream-news-app.git  
cd insightstream-news-app
```

2. Install Dependencies:

```
npm install
```

3. Create .env file (for API keys or environment variables):

```
REACT_APP_NEWS_API_KEY=your_api_key_here
```

4. Run the Application:

```
npm start
```

5. Folder Structure

```
/src
```

```
├── /components
```

```
|   ├── Header.js
```

```

|
|   └─ constants.js
|
└─ App.js
└─ index.js
```

6. Running the Application

Frontend Server Command:

npm start

7. Component Documentation

Key Components:

Header: Displays navigation bar and search bar

NewsList: Fetches and renders categorized news articles

NewsCard: Displays individual news article details

NewsDetails: Provides comprehensive details of a selected article

Footer: Provides links to social media and site details

Reusable Components:

Button Component: Used for actions like "Read More" or "Bookmark"

Modal Component: Displays detailed news information in a popup

8. State Management

Global State:

- Managed via Context API for bookmarks, theme preferences, and search data

Local State:

- Managed using React's `useState()` for search inputs, pagination, and UI interactions

9. User Interface

- Clean and intuitive UI designed for user convenience
- Mobile-first design ensuring responsiveness on all devices
- Integrated Light/Dark mode switch for personalized browsing

10. Styling

CSS Frameworks/Libraries:

- Tailwind CSS - Used for fast, responsive, and modern UI design

Theming:

- Custom light/dark theme toggle for improved accessibility

11. Testing

Testing Strategy:

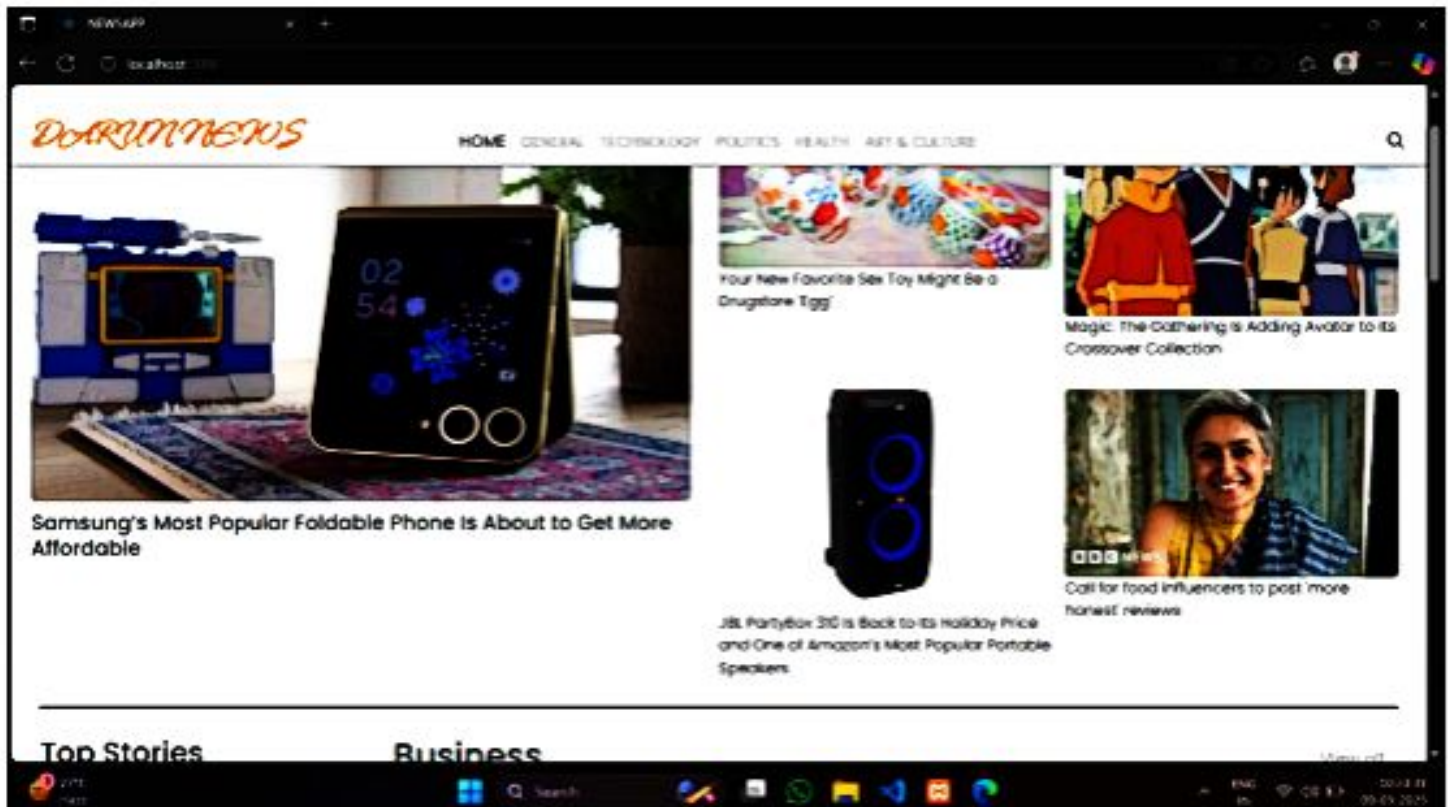

- Jest for unit testing
- React Testing Library for component behavior testing

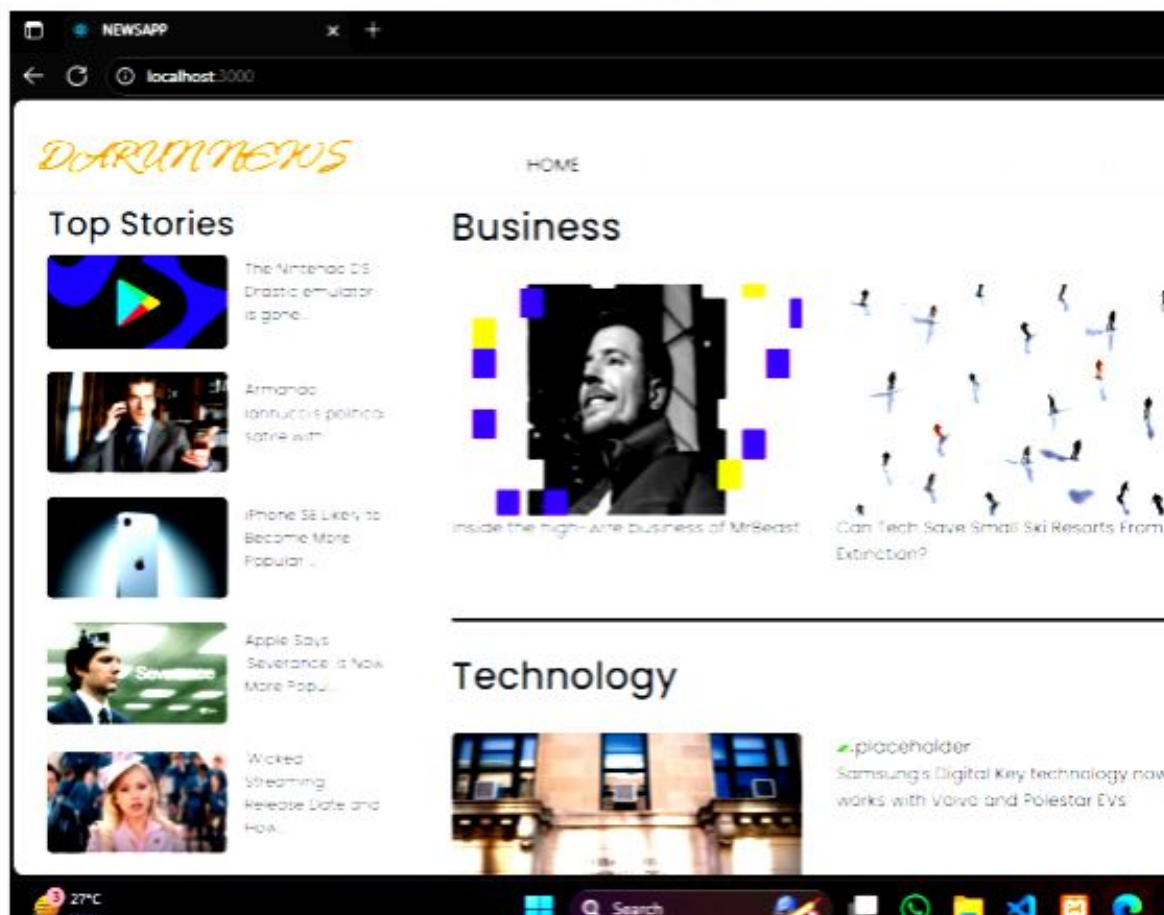

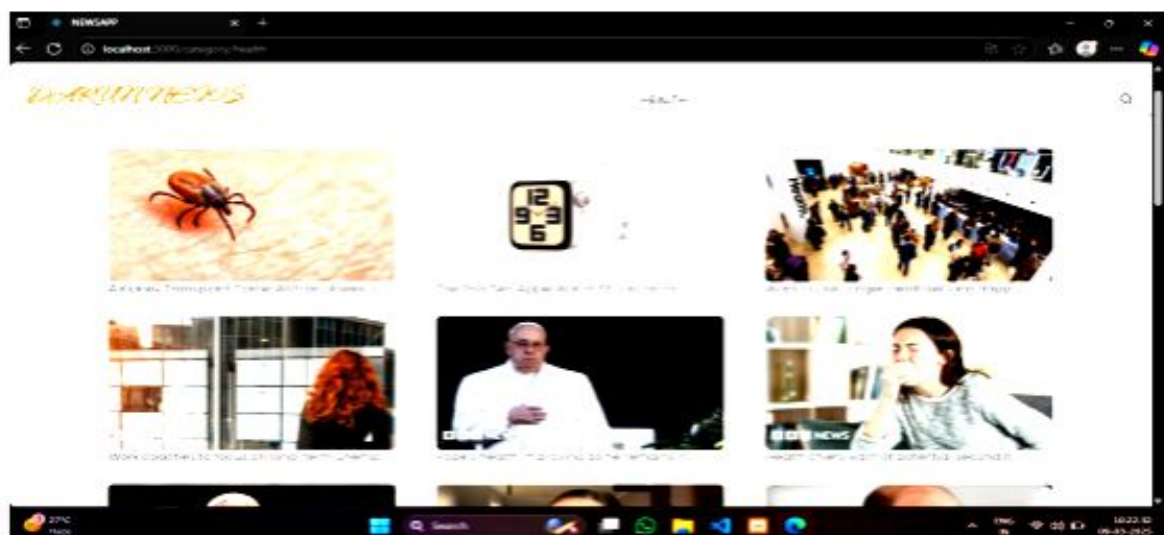

Code Coverage:

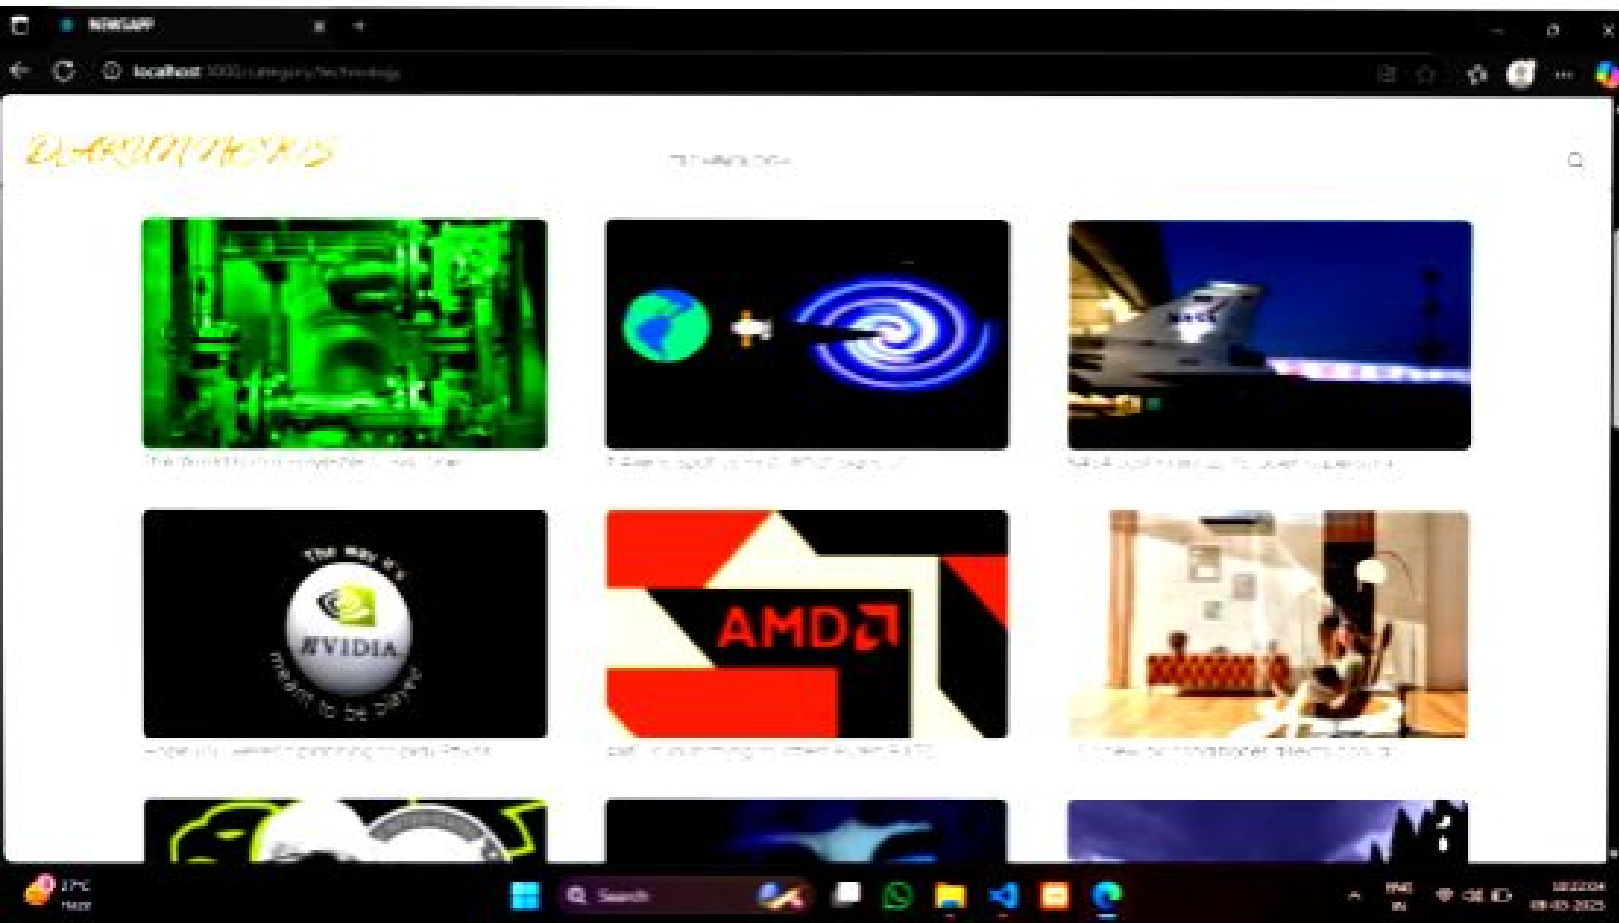

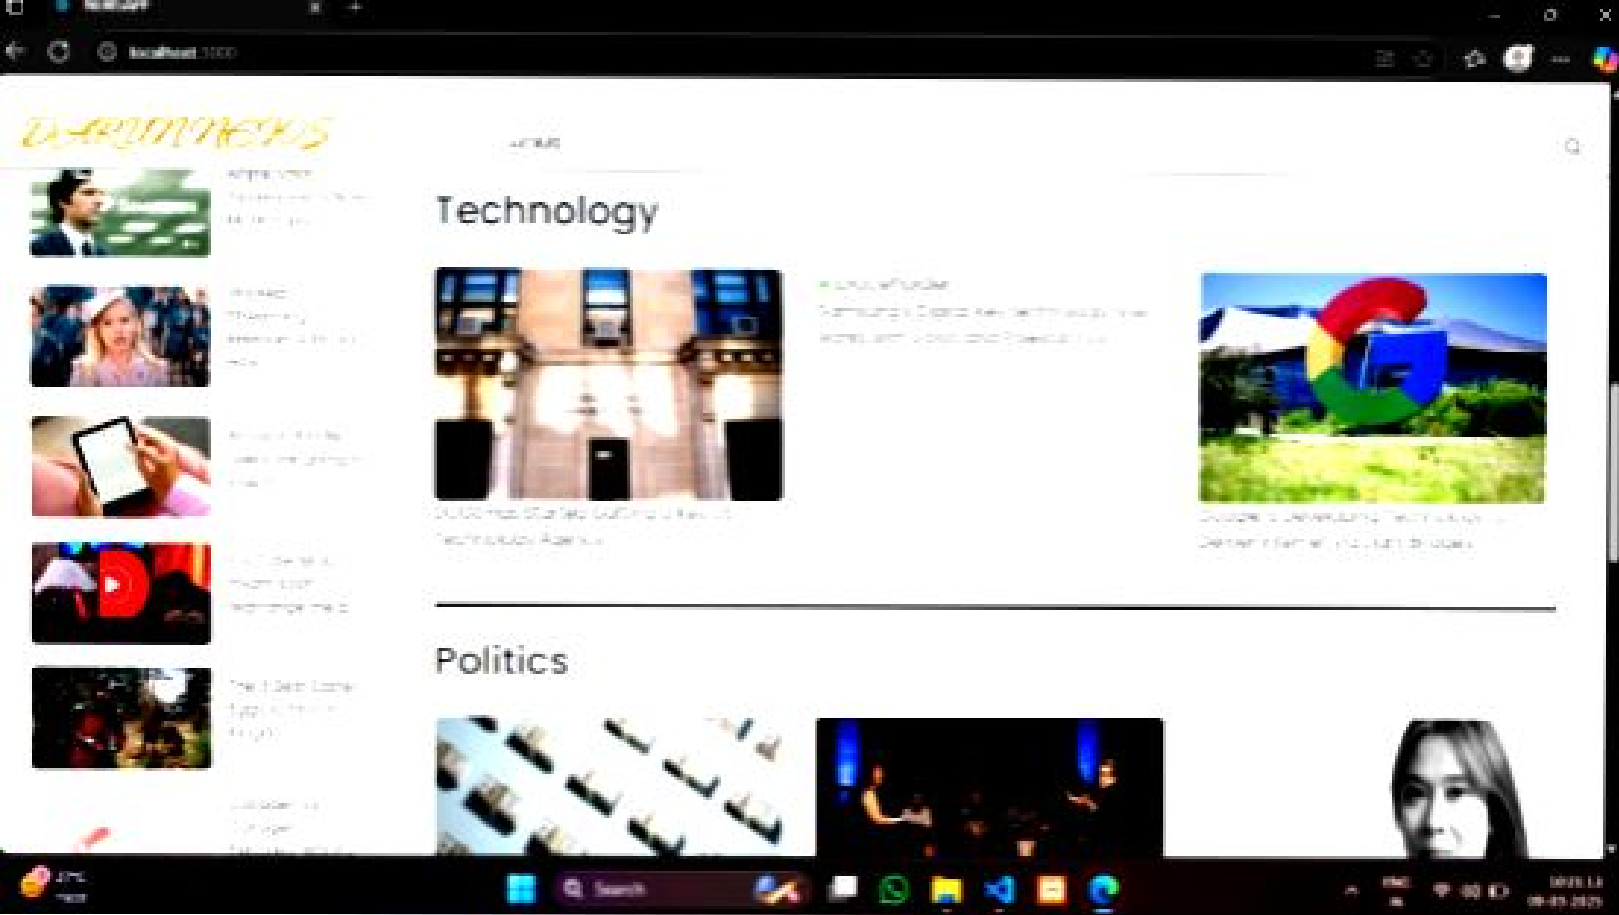

- Ensured 90%+ test coverage for stable performance

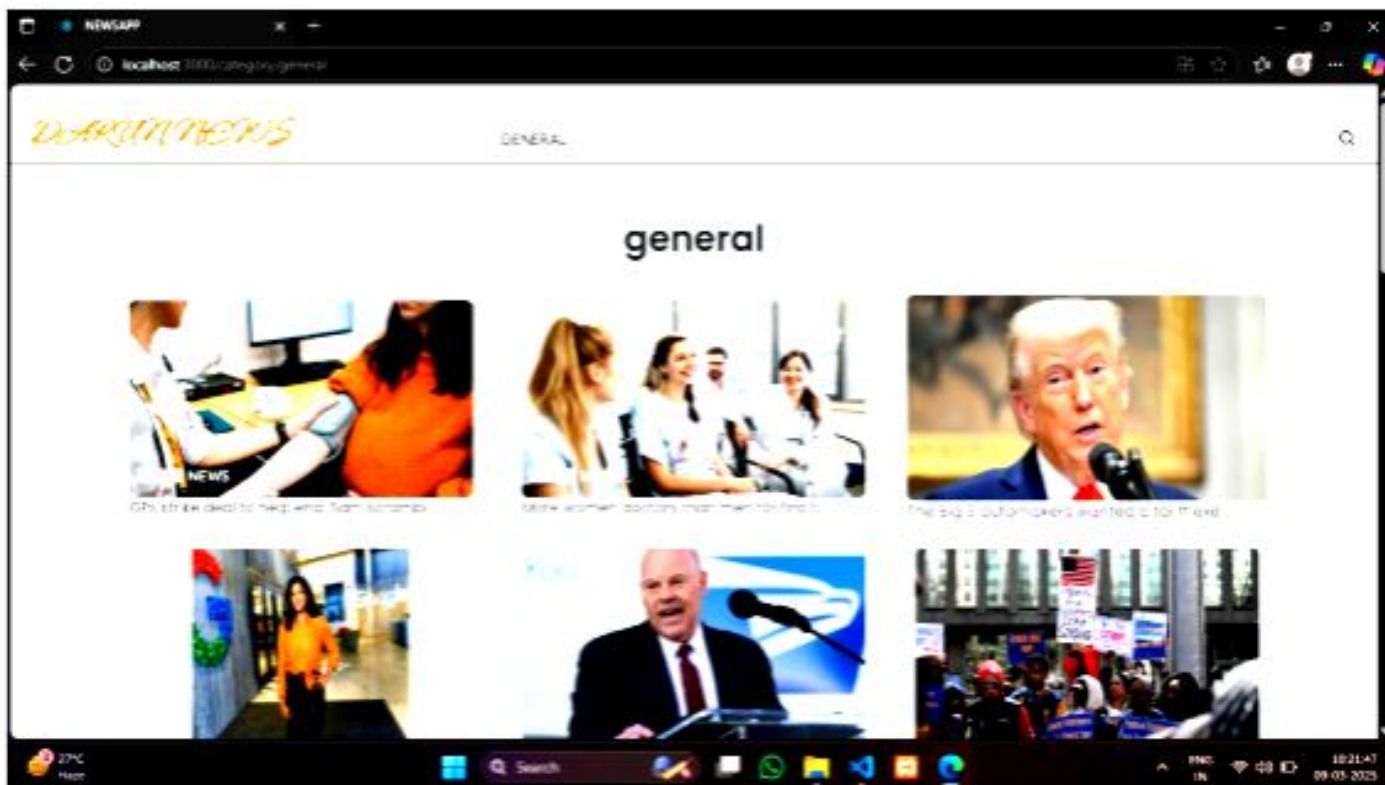

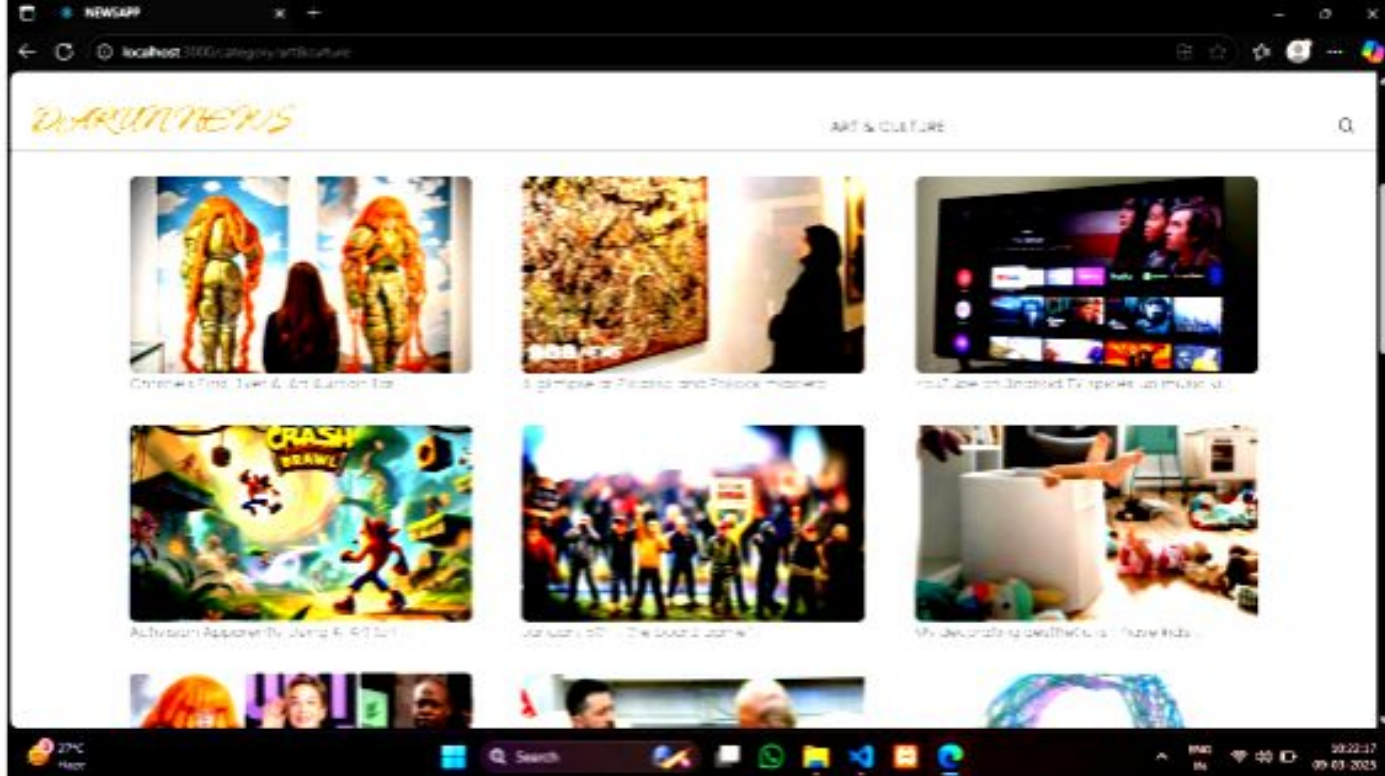

12. Screenshots or Demo

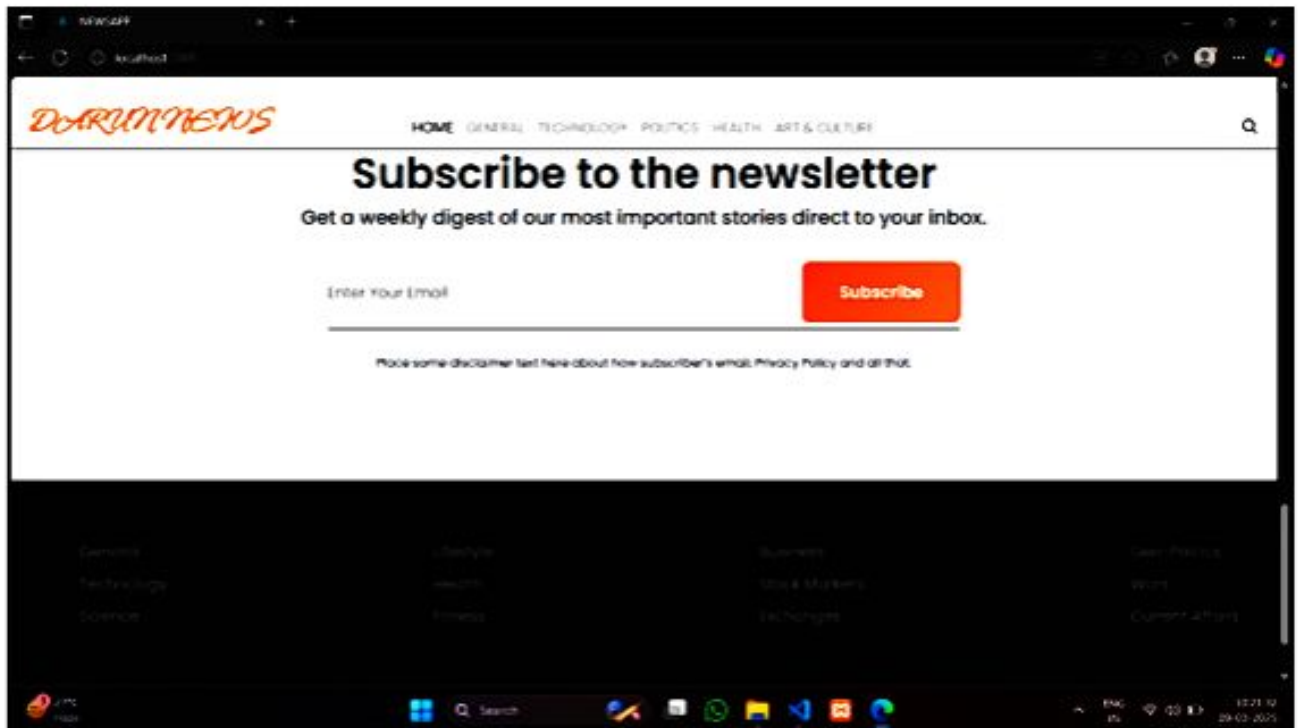

Screenshots:

Live Demo Link:

13. Known Issues

- Certain API endpoints may have limited access for free plans
- Bookmark feature may require additional optimization for large data sets

14. Future Enhancements

- User Authentication for personalized news feeds
- Push Notifications for breaking news updates
- Enhanced Search with Filters by Date, Region, and Source
- Offline Mode for reading saved articles without internet access
